

“There is a constant need for new systems and new software.”

Marc Andreessen

We are the team of software developers, architects, testers and projects managers, who can help you transform your idea into a new powerful and scalable product. We are delivering high-quality software under ambitious deadlines. Software delivery time of our team is up to twice faster than industry median. We are reliable partners in your journey to success. **We are Proit SW.**

Proit SW is an IT company developing a wide scope of complex and professional IT solutions for the private and public sectors.

Proit SW has been delivering software products and performance testing solutions for its clients for over 10 years. The company has also long experience developing and testing software in projects of national scale (e.g. Tax Accounting Information System) and high risk critical systems (e.g. Customs Risk Assessment and Control Information System). Combining years of industry experience with technical

expertise and domain knowledge, Proit SW can help you ensure your systems will not fail in peak conditions. The company is installing, developing and supporting systems (e.g. OpenText Documentum), which are based on international standards and are used in the EU. Testers are professionals who have experience working with various testing tools (e.g. NeoLoad, LoadUI, etc.) therefore the team is very productive and efficient.

# TEAM

---

Our teammates have over 10 years of experience in leading successful international IT projects. We bring expertise and practical know-how in the IS architecture, analysis, development, support and project management fields.

Based in Dallas, TX and Vilnius, Lithuania, our mission is to help our clients to effectively manage business and organizational processes and increase their competitive advantage by using and implementing Proit SW most advanced information systems (IS). There are over 40 members in our team and the number can be expanded easily up to 100 or more.

*“In Proit SW, we are passionate about developing information systems that empower companies, institutions and society to be more efficient and advanced. To achieve this, we consistently collaborate with the best IT talents and international partners.”*

Justinas Brokorius, CEO of Proit

# COMPETENCES

---

We apply globally recognized project management methodologies like Agile (we have certified Scrum Masters, Project owners, etc.) and PMBok (CompTIA project+ is like PMP). We also have certified business analysts (BCF Foundation Certificate in Business Analysis).

Our developers are experts of Java and .Net technologies, Oracle DBMS. We have developers certified in these areas:

- Oracle Certified Associate, Java SE 8 Programmer,
- Oracle Certified Professional, Java SE 6 Programmer,
- Oracle Certified Expert, JAVA EE 6 Web Services Developer,
- MCAD, Microsoft Certified Application Developer,
- Microsoft Specialist: Programming in HTML5 with JavaScript and CSS3,
- Microsoft Certified Professional, etc.

We have very strong and experienced testers team, who have certifications:

- ISTQB®-BCS Certified Tester Foundation Level,
- ISTQB® Certified Tester, Advanced Level, Test Manager,

- BCS Intermediate Certificate in Software Testing,
- ISEB Foundation Certificate in Software Testing, etc.

The team has profound experience and knowledge of OpenText Documentum enterprise content management system:

- Enterprise Content Management – Content Management Systems Architecture (EMCTA – Technology Architect)
- Content Management Foundations (EMCPA - Associate)
- Content Management Web Application Programming Specialist Version 6 (EMCApD – Application Developer)
- Content Management Server Programming Specialist Version 6 (EMCApD – Application Developer)

We apply our own unique internal project management methodology to each of your project's core stages: needs and requirements analysis, IS architecture development, deployment and testing, and IS user training. The team has these certifications in in IS architecture development:

- Oracle Certified Master, Java EE 6 Enterprise Architect,
- MCSD, Microsoft Certified Solution Developer,
- EMC Proven Professional, Associate - Enterprise Content Management, etc.

Growing number of successful projects encourages us to improve further and take on larger challenges. Also, for the company to work successfully it helps that we newly implemented the integrated and certified Quality, Environmental, IT Service Management and Information Security Management System, which meets the requirements of these international standards: ISO 9001: 2015 "Quality Management Systems -- Requirements", ISO 14001: 2015 "Environmental management systems -- Requirements with guidance for use ", ISO / IEC 20000-1: 2011" Information technology -- Service management -- Part 1: Service management system requirements" and ISO / IEC 27001: 2013 "Information technology -- Security techniques -- Information security management systems -- Requirements".

We have designed and developed a stable and innovative IS framework JHighway which enables us to develop all the necessary IS functionalities from scratch quickly and perfectly. For more than ten years, JHighway has been delivering complex, feature-rich systems for low maintenance web-based business applications.

We have developed rule-based analysis tool - Prorules. This tool is very useful for robotizing of manual processes. We have solution for Telco, Finance, IoT and other industries. Farther development of Prorules cover Hadoop and machine learning technologies.

The integrated management system in our company is documented, implemented and supervised. It is being constantly improved and its performance, including environmental performance, is constantly being revised. We focus on the needs of our customers, comply with our commitments, we provide products that meet the agreed requirements, and operate in accordance with the highest standards of service and quality.

## SOME OF THE PROJEC

---

The company has developed and tested software in projects of international and national scale, high risk critical systems and mobile apps. In the past, the company's strategy was to work on national scale projects, therefore the largest ProIT SW customers were government agencies or government-owned organizations. ProIT SW has recently turned to the business segment, as company's experience in complex projects is very beneficial for business as well.

### **State Tax Institutions in two EU states.**

TAX RISK ANALYSIS, AUDIT SUPPORT, AND CASE MANAGEMENT SYSTEMS.

In partnership with INTRASOFT, we have implemented ESKORT Compliance Solutions. This system carries out automated risk assessment procedures and provides advanced management tools to perform risk-based case selection for control procedures or further risk monitoring, control activities' management, and enhance as well

as support complex decisions and other risk-related activities.

### **Vilnius University Hospital Santariskes Clinics.**

HOSPITAL INFORMATION SYSTEM (HIS) AND ADVANCED PATIENT REGISTRATION SYSTEM.

HIS serves as a hospital management tool as well as a database for all patients' medical records, enabling fast and reliable access to the information they need. The Advanced Patient Registration System connects 20 Lithuanian hospitals and expedites patient intake processes with its e-registration feature.

### **Mobile operator in Nordic & Baltic region.**

SOLUTION OF FRAUD AND REVENUE ASSURANCE MANAGEMENT FOR TELECOMS.

This system enables functions for fraud prevention, ongoing fraud detection, and overall threat reduction practices. And also

the system enables to measure the actual revenue assurance performance at defined control points against the expected performance, report anomalies and manage resolution.

### Transport Service Provider.

#### ELECTRONIC VIGNETTES SYSTEM.

Proit has developed and integrated Electronic Vignettes System (EVS), which allows drivers to buy electronic vignettes (e-vignettes) by the Internet. E-vignettes can be purchased online at [www.roadtoll.lt](http://www.roadtoll.lt). Drivers or companies can create their own profile on the main page of the website. They can order e-vignettes by filling out the order form or using their own profile on the website. The portal supports instant e-payment services with many banks, credit

cards providers. EVS is integrated in common transport management system, which is managed by Lithuanian Road Administration.

### Courts of one EU state.

#### COURT CASE MANAGEMENT SYSTEM.

A well-designed court case management system based on OpenText Documentum deliver core functionality that provides meaningful ancillary benefits to the courts, such as more efficient data entry, more effective data retrieval, better tools and enhanced bar and public access. Lithuanian courts have more than 32 000 unique users, a growth of documents is about 1 000 000 yearly and repository objects are increasing about 25 000 000 per year.

## PARNETRS

---

## VALUE PROPOSITION

---

Proit SW **software development and testing** services help everybody **from startups to large enterprises to transform ideas into** new powerful and scalable **products (services)**.

Proit SW delivers high-quality software under ambitious deadlines. Software delivery time of Proit SW team is up to twice faster than industry median. Proit SW testers are professionals who have experience working with various testing tools therefore the team is very productive and efficient.

Key benefits:

- Shorter time to market of new complex products (services).
- Less revenue losses due to poor services (products) quality.
