

We are a team of software developers, architects, testers, and projects managers who can help you transform your idea into a powerful and scalable product. **We are reliable a partner in your journey to success.**

We are Proit.

## **WE DELIVER HIGH-QUALITY SOFTWARE WHILE MEETING AMBITIOUS DEADLINES.**

- **Software Development**

We deliver high-quality software while meeting ambitious deadlines. Our team’s software delivery time is up to two times faster than the industry median. Proit’s JHighway framework allows us to develop higher quality software (20-40% than the industry average).

- **Testing of Software Products and Services**

We can help software development teams to reduce time to market of new products and losses of revenue due to a poor quality of products by testing their developed software products and services.

- **Development of Robotization Solutions**

We can help you robotize manual processes in different industries: finance, telco, IoT, government and gambling. We are developing those solutions based on rules, big data, artificial intelligence, and blockchain technologies.

- **Setup and Integration of Opentext | Documentum Solutions**

We can help mid-sized and large enterprises transform ideas into new, powerful, and scalable content management systems that are based on the OpenText Documentum platform. Our experienced professionals can consult customers on preparing the best possible configuration, including a selection of an optimal set of Documentum components, integration of Documentum components according to the needs of the users.

- **Delivery and Integration of ProRules Product**

We can deliver and integrate our product ProRules, which is a tool of robotic process automation. It helps to automate the routine tasks across your legacy and modern systems and to free your workforce. It can be used to drive even more value to the customer or increase the productivity of the organization.. ProRules solution reduces costs by 30-50%.

- **Delivery of JHighway Tool**

We can deliver our tool JHighway, which is a framework of web-forms templates for quicker (up to two times faster than industry average) and higher quality (20-40% higher than industry average) development of applications. It is solution based on open source technologies, such as Java, EJB, GWT, Vaadin, Birt, JBoss, and Tomcat.

In **our portfolio**, there are many solutions for government, healthcare, finance, telco, transport, retail, IoT and others industries.

We have 40 teammates and the number can be expanded easily up to 100 or more. Our staff certified in the following areas: project management, business analysis, IS architecture, software development, testing, Documentum integration, quality management. We base in Dallas, TX and Vilnius, EU.
