

*American Chamber of Commerce in Lithuania 2018*

**Dear colleagues,**

American Chamber of Commerce in Lithuania would like to take the opportunity to introduce our member Proit, an IT company based in Lithuania that develops a wide-range of complex IT solutions for the private and public sector, who are looking for partners and customers in the United States of America. Proit is certified and operates in the following range of fields: project management, business analysis, IS architecture, software development, testing, OpenText Documentum integration, quality management, blockchain and AI.

Proit's well-diversified portfolio contains worthwhile solutions for government, such as tax risk analysis, audit support, case management systems; health care, such as hospital information system, advanced patient registration system; telecoms and transport companies, such as solutions of fraud management for telecom's and transport management systems; and more.

The company is oriented towards helping mid-sized enterprises to transform their ideas into powerful and scalable products. A good example of their products is ProRules, which is a tool of robotic process automation. The tool helps to automate the routine tasks across modern systems and frees the workforce. ProRules can be used to drive even more value to the customer, increase the productivity of the organization, and reduce costs by 30-50%.

Proit's professional team delivers high quality software while meeting ambitious deadlines that exceed average industry delivery times. The company is using their developed JHighway which is a framework of web-forms templates for quicker (up to two times faster than industry average) and higher quality (20-40% higher than industry average) development of applications. It is solution based on open source technologies, such as Java, EJB, GWT, Vaadin, Birt, JBoss, and Tomcat.

The company has successfully developed and tested software for projects involving high risk critical systems, mobile apps and projects of both international and national scale. Proit has developed The Risk evaluation Analysis and Control Information system for Customs Department of Lithuania. In real time, their system traces and analyzes traders, declarations, and other risk-related objects which pose the threat of illegal actions during clearance and post-clearance. Electronic Vignettes System (EVS), which allows drivers to buy electronic vignettes by the Internet, was developed by Proit. EVS is a mobile portal solution which supports instant e-payment services with many banks, credit cards providers.

The company previously oriented their business strategy towards working on projects of national-scale, therefore their largest clients were government agencies and government-owned organizations. Tax risk analysis, audit support, and case management systems for State Tax Inspectorate under the Ministry of Finance of the Republic of Lithuania and State Revenue Service Republic of Latvia; Risk Assessment and Control Information System for Social Fund of Lithuania; Information systems for territorial planning process management for State Territorial Planning and

Construction Inspectorate under The Ministry of Environment; Court Case Management System for Courts of Lithuania and other projects. Recently the company has delved into working with clients in the private sector as the company's involvement in complex projects can be profitable to business. The average payback period of the projects is 9-18 months.

At your request, we can provide you with further details about Proit, should you or someone you know would be interested in cooperation or have any further questions about the company, or the services they provide.
